ABSTRACT

The Romanian shipbuilders' use of English on a daily basis in multicultural environments, such as Damen Shipyard Romania, allowed business terms to develop as an important part in the naval architecture language, both spoken and written.

The present paper aims at identifying the most common business words encountered in shipbuilding documents by Damen Shipyard Romania and their possible equivalents, if any.

The Romanian naval architects' tendency to keep the original form of the English element or the adaptation of the English word to the phonetic, orthographic and morphological characteristics of Romanian is also illustrated in this paper.

The data collected and analyzed in this paper can be used to predict a pattern followed by Romanian naval architects when dealing with business English in their field.

Key words: naval architecture, loan translation, adaptation, business English

Introduction

Languages, as Bogaards argues, are “alive” (2008: 97). They are a way of communicating in a linguistic community which is always in evolution and which continually needs to adapt itself to the communicative needs of its speaker.

English has become a global language and is the lingua franca of the world at present (Seidlhofer 2001: 133). This influence is mainly due to two important factors: British imperialism and the USA gaining worldwide power following World War II with its strong economic and cultural influence (Britannica Concise Encyclopedia on-line). In the naval architecture field, English has emerged as the main language of international meetings of specialists, in shipyards all over the world and in international scientific exchanges by means of, like in our case, journals.

A person living for a few years in an English speaking community or, in our case, working with English on a daily basis, has a tendency to blend Romanian and English. An “outsider” (i.e. not used with the business environment) does not understand the English words. He/she might not know that *management, planning* means, but can easily recognize the “music” of the Romanian language in *planningul, echipa de engineering, piața offshore*. A relevant example of business terms is the expression *to make sense* used as *a face sens* by many naval architects on a daily

basis. It is a calque and a mot-a-mot translation. Another example of the kind is *suportarea clientilor* instead of *sustinerea clientilor*.

English business terms tend to replace Romanian in shipyards and engineering companies. This is a normal tendency since the majority of our shipbuilding companies are owned by foreign companies (Damen- Dutch, VARD- Italian, Daewoo- Korean). Conversations, newsletters and journals are written in English. In our country, only Damen Shipyard Galati issues bilingual newspapers entitled “Noutăți”.

The present paper aims at identifying the most common **business English terms** encountered in the bilingual naval architecture magazines published by Damen Shipyard and their possible equivalents, if any.

Material and Methods

We have studied all the bilingual naval architecture journals published by Damen Shipyard (9) in order to gather the most frequently used business English terms used in Romanian shipyards. A few examples recorded in our corpus will show the degree of adaptation of the English loanwords. The following examples are used on a daily basis by naval architects in Romanian journals: *planning*, *commissioning*, e.s.o. Loan translations such as *kick-off meeting*, *CEO*, *management* do not have a Romanian equivalent or tend to be used as loan words instead of their Romanian equivalents. In order to discover the most frequent **English business terms** in naval architecture journals, we have studied the English words present in Romanian journals and counted their occurrence.

Results

The present study shows a certain preference for loan translation as source of **business terms** in shipyard newsletters. However, the presence of different types of English words in Romanian shipbuilding journals is the proof that this scientific field borrows, adapts or translates words in order to provide the necessary knowledge to those who need it (naval architects, students, workers in the field).

The majority of **business terms** occurrences were *commissioning* (5), *planning* (6), *contract* (5), *subcontractors*(6), *staff* (9), *quality* (9), *efficiency* (9).

The least used **business terms** were *family business* (1), *offer*(1), *contract*(1), *delivery* (1), *suppliers* (2), *price* (2), *management*(2).

Commissioning- definition, translation, example(s)

A quality focused process for enhancing the delivery of a project. The process focuses upon verifying and documenting that the facility and all of its systems and assemblies are planned, designed, installed, tested, operated, and maintained to meet the Owner's Project Requirements.¹

1. În scopul asigurării serviciilor de control a climatizării către clienții noștri oricând și oriunde s-ar afla aceștia, compania noastră pune la dispoziție propriul departament de testare și **commissioning**, deservit de ingineri cu înaltă pregătire tehnică care pot fi repartizați diferențial pe proiecte din întreaga lume. (Damen shipyards Galati Romania, Noutati, 18.12.2014, p. 16)
2. Adesea interpretat gresit, procesul de **commissioning** este considerat ca fiind concentrat exclusiv pe testarea și punerea în funcțiune a echipamentelor la sfârșitul fazei de construcție a unei nave. (Damen shipyards Galati Romania, Noutati, 11.07.2012, p. 18)
3. Un **commissioning** bine planificat creează oportunitatea identificării abaterilor și defectelor, precum și corectarea acestora – fără a se întârzi termenul de livrare. (Damen shipyards Galati Romania, Noutati, 11.07.2012, p. 18)
4. Capacitatea de a asigura un **commissioning** integral prin resurse proprii, respectarea termenului de livrare și menținerea ridicată a standardelor de calitate, fac parte din strategia noastră. (Damen shipyards Galati Romania, Noutati, 11.07.2012, p. 18)
5. “Incredere” și “profesionalism” – iata două cuvinte puternice, aparent simple, care definesc echipa de **commissioning** ! (Damen shipyards Galati Romania, Noutati, 11.07.2012, p. 18)

Planning- definition, translation, example(s)

Planning (also called forethought) is the process of thinking about and organizing the activities required to achieve a desired goal.³

52. *Helmers is a well organized, internationally operating technical organization with a highly educated management team.* (Damen shipyards Galati Romania, Noutati, 15.11.2013, p.11)

Limitations of the study

English shipbuilding journals prevail. Nowadays, the vast majority of naval architects know English. It is not necessary to translate English journals into Romanian.

Conclusions

The most common English business words encountered in Romanian naval architecture journals are *staff* (personal), *planning* (planificare), *client* (client), *management* (no Romanian equivalent), *commissioning* (no Romanian equivalent).

The use of **English business terms** found in shipbuilding newsletters is not a negative phenomenon in itself. It enriches the Romanian vocabulary. Most likely, some of the words will be assimilated in the Romanian language whereas others will become obsolete. In the Romanian language's history many languages brought foreign words which are still present in our vocabulary. Since English is lingua franca for the naval architecture field it is normal to use English words and blend them with Romanian. What we can do to preserve our language is to use the Romanian equivalent, where possible, and accept the English word where there is no Romanian equivalent.
